

# From UDig to ... ADDITIONAL CREDIT!!

Earn 2 additional hours of relicensure points

When you've earned credit today for Teacher Trilobite Day 2021, completed the assignment described below, and participated in the zoom Oct. 19.

**REGISTER FOR MIDAS 42860 Section 3.**

ASSIGNMENT DUE via email OCTOBER 17, 2021

(a) go outside near your school or home and look around.

**(b) recognize patterns of layering and/or cross-cutting relationships just as we practiced today.**

(c) email me (genevieveatwood@comcast.net) by October 17, 2021 with:

**Two attachments! jpg or pdf images of the patterns of layering or cross-cutting relationships you think you see. One image should be detailed showing the pattern. The other should be a broader scale showing context.**

**AND email me text as an email or attached .doc or .pdf:**

\*Where you took the image from (address if possible),

\*Which direction you took the image toward,

\*Name of a landscape feature in the image if known, Okay if not.

\*A few sentences describing a pattern you think you see that shows the relative age of rock units or features, meaning older vs younger. Could you teach this to someone? Who (family? students?). How do feel about this?

In the ZOOM we'll work on these together.

GOAL of the ASSIGNMENT:

GO Outside!! See local Earth Science!

Have confidence (and hopefully JOY) to go outside by yourself and even with your students and see patterns that surround you. **When you can see patterns... you can be a scientist!**

## TUESDAY, OCTOBER 19, 2021

### After school: 3:30PM?

## ZOOM

492 380 9644 password 1946

We can discuss details at UDig... such as what time in afternoon.
